

Tactical Internet Gateway (TIG) Mini w/ Certified Encryption

Rugged Small Form Factor Gateway

- Multinet Bridge supporting Multicast / Unicast CoT / PLI
- SATCOM Integration
- Commercial/Tactical MANET Integration
- Private / Tactical LTE integration
- Unmanned Systems/Sensors Integration
- NIAP/NSA Certified Encryption (Add On)
- Dual Integrated Cellular Radios (LTE/5G)
- Multi-WAN Operations

What separates the TIG from the rest?

- Bonding and Aggregation of all WAN links
- SD-WAN Smoothing Minimizes latency and reduces the impact of packet loss
- Perfect for Voice and Video applications
- Improves upon IPSEC: Each WAN link has its own encryption key
- On-premise cloud management server to globally manage all your TIGs
- L2 bridge over L3 VPN to support multicasting without specialized equipment
