FLEXBRIDGE RoIP Gateway (FBR)

A low SWaP, rugged gateway built for interoperability and to unify legacy and next-generation communications systems.

Use Cases

- P25 Integration (Motorola, ICOM)
- Legacy Analog Radios (PRC-148/152)
- PTT Bridge (InstantConnect, WAVE)
- Body-worn or Vehicle Mounted
- Integration with TIG for BLOS RoIP

Features

- Compact and lightweight (3.75in x 1.45in x 1.1in)
- Its IP67-rated enclosure makes it suitable for use in the elements
- Interoperable across analog communications, Land Mobile Radios, and digital (Internet Protocol) infrastructures
- Powered via USB
- End-to-end voice and data encryption using IPsec and Transport Layer Security (TLS)
- Supports P25, Motorola, Commercial Analog, and MIL SPEC radios (PRC 148, 152, 163, 117G)
- Uses an intuitive Web User Interface
